The last judgement of V. Nestorescu

The Romanian Grandmaster of the FIDE for chess composition, Virgil Nestorescu (b. 1929-d.2018) is well known in the world of endgame studies. I found by chance his last award, published in Gambit magazine 4/2010: *V. Nestorescu 80JT*.

I reproduce here several award-winning works. Lets begin with an astonishing work by the Armenians A.Gasparian and A. Manvelian.

A. Gasparian & A. Manvelian
1st Prize, Nestorescu 80JT

5+6

win

A. Gasparian & A. Manvelian
1st Prize, Nestorescu 80JT
Version M.Croitroir

5+6

win

Solution: **1.Rf2!** Be7 2.Rxd7 Sc8 **3.d6! e5+** (3. ...Bxd6 4.Rg7+ Kh6 5.Rc2 Se7+ 6.Rxe7 Bxe7 7.Rxc4 Kg6 8.Rc6 Kf5 9.Kf7) **4.Kh8 Bf6+ 5.Rxf6+ Kxf6 6.Rf7+! Ke6** (6. ...Kxf7 7.d7 Be6 8.d8=Q) 7.d7 Sd6 8.d5+! Bxd5 9.d8=S# *A study of high artistic value, in which White creates a model mate, as the result of a triple active self-block and the promotion into a Knight, difficult to anticipate.* (judge)

Later, Nestorescu received a cook: **1.Rf3!** He was probably upset that he had to eliminate this beautiful study. When I showed this work to Mihail Croitor, he quickly found a version with **Rf8 to d2**. Now, only **1.Rf2!** is possible. We conclude that the authors could have found themselves this correction and the award should be preserved.

The second Prize is a sort of massacre game:

1.Kc7! Kc4 (1. ...Ba5+ 2.Kc8 Qxe3 3.b8=Q+ Bb6 4.Sc7+ Kc5 5.Qxb6+ Kxb6 6.Sd5+) **2.b8=Q Qxd6 3.Kxd6 Be5+ 4.Kc6 Bxb8 5.Sf3!** (5.Sg4? Kc3 6.Sd4 Se5+! 7.Sxe5 Bxe5=) **5. ...Se5+ 6.Sxe5 Bxe5 7.Bb6!** (7.Bd2? Bc3! 8.Be3 Bh8! 9.Bb6 Kc3=) **7...Bh8** (7...Kc3 9.Kd5!) **8.Ba5! Bc3 9.Kb6!** (9.Bd8? Ba5! 10.Be7 Bd2! 11.Bf6 Bc3! 12.Bd8 Ba5!) **9...Bxa5+ 10.Kxa5 Kc3 11.Sd4 Kxd4 12.Kb4!** Win. *Surprisingly, the only way to win is when all white pieces disappear, which sets the c2 Pawn, the last soldier on the board, in motion.* (judge)

M. Doré & A. Pallier
2nd Prize, Nestorescu 80JT

7+4

win

M. Hlinka & L. Kekely
3rd Prize, Nestorescu 80JT

5+6

=

Solution: **1.c7 Rh4+ 2.Rxh4 Bd5+ 3.Kh2 Rxd7 4.Sf3+!** (4.c8=Q? Bd6+ 5.Kh3 Be6+ 6.Rg4 Rh7+) 4...Kf1 5.c8=Q Bd6+ 6.Kh3 Be6+ 7.Rg4 Rh7+ 8.Sh4 Bxc8 stalemate. *A beautiful and unexpected stalemate position with two white pinned units, obtained after dynamic play on both sides.* (judge)

Some records with stipulation Ser-s=

The well known composer and friend **George Spicacs** from United States kindly accepted to write this interesting article for Quartz. He is an expert in series movers and is very active from 80-ies beginning till now. Enjoy!

The purpose of this short article is to present a few records with the stipulation Series Selfstalemate. Two types of records are examined, **Length Records** and **Promotion Records**. We chose the particular stipulation ser-s= because of two reasons: First, some of the examples presented here appear to be doable only with this stipulation and no other. Second, some promotion tasks are relatively new. It is useful to have some occasional collections of records, encouraging further investigations. The overall length record, **Tomasevic's ser-s=116**, by one of the greatest composers of seriesmovers, is certainly worth revisiting, for its skillful construction.

1) 1.Kg3 2.g5 5.Kxe4 6.Kf3 7.e4 19.Kxd8 34.Kxe6 50.Kxe8 66.Kxg6 83.Kxf8 101.Kxd6 102.Kxe5 103.Kd6 106.e7 109.Kf8 110.e8=Q 111.Qf7 114.Kg6 115.Qxf2 116.Qf8+ Qxf8=

1) Milos Tomasevic feenschach 25/2004(v)

4+16

ser-s=116

2) Erich Bartel &

A. H. Kniest

Sfrankfurten Notizen 1966

2+2

ser-s=15

3) Ljubomir Ugren

4 Prize, Mat 1980

14+1

ser-s=40

4) Arno Tungler

KobulChess/2018

8+10

ser-s=55

With only four units on the board and lots of interesting play, the classic ser-s=15 appeared almost sixty years ago, among the earliest examples with this stipulation.

2) 3.e6 4.Kg6 5.Kf7 7e8=Q 8.Qd7 11.Kc8 12.Qc7 14.Ka8 15.Qb6+ K,Qxb6=

Our third example, by L. Ugren, is the longest ser-s= with minimal stalemating force. It is an unusual setting, very appropriate for the stipulation: White must immobilise the entire force, with admirable accuracy.

3) 7.Ke8 8.Qh8 9.Bh7 10.Rg6 11.e6 12.Bd4 13.Ba7 14.Bb8 16.a8=R 17.Ra5 18.Rf5 22.a8=Q 23.Qa3 24.Qaf8 29.a8=Q 30.Qa2 31.Ba7 32.Bd4 33.Bg7 34.Bh6 35.Rdg7 36.e7 37.Qag8 38.Rff7 39.f5 40.f6 Kxc7=

The specific category of seriesmovers without any capture by either side was examined a few years ago in StrateGems. The impressive ser-s= by Arno Tungler, longest for ser-s= **without any captures**, was never quoted in that magazine, and sadly that has now ceased publication.

5) G. Sphicas

Ideal-Mate Review, 1988

2+14

ser-s=73

4) 1.a4 9.Bg7 13.Kh5 17.Bg3 19.Kf3 20.Bf2 22.Kf1
24.Bd2 27.Kc1 35.Bb6 37.Ka1 44.Bf2 46.Ka3 53.Bb6
54.Kb4 55.c4+ Ke4=

A final example is the ser-s=73, longest in the sub-category of problems ending with **ideal stalemate**. It may be worth presenting in the hope that others may explore possibilities for longer settings.

5) 2.Kxb5 11.Kxh6 24.Kxd7 26.Kxf8 41.Kxh8 56.Kxf7
57.Kxe8 59.Kxc7 61.Kxe5 62.Kxf4 63.Kxe3 64.Kf3
69.e8=Q 70.Qxe1 72.Kg1 73.Qg3+ Kxg3=

Some promotion records

The well-known masterpiece by Z. Maslar, with eight promotions to Bishop, is the best example of an achievement unique to this stipulation. It is hard to imagine doing anything like that with any other series stipulation.

6) 1.d8=B 2.d7 3.d6 4.d5 5.Sd4 6.Se6 7.exf8=B 8.Bh6 9.f8=B
10.f7 11.Bh4 12.d8=B 13.d7 14.d6 15.Kd5 16.Sg5 17.Sh7
18.Bdg5 19.d8=B 20.d7 21.Rg6 23.axb7 24.b8=B 25.Be5
26.Bh8 27.Bfg7 28.f8=B 29.Rf7 30.Bdf6 31.d8=B 32.Bde7
33.Ke5 34.Qc4+ Kxc4= This version is in f-111, p.249.

Another example of a task very likely impossible with other stipulations is seven promotions to Rook. That was done twice: first in a ser-s=39, **Sphicas** F2126v, The Problemist Nov.2002 (see 7), and later by **Maslar**, in 8 here (*)

6) Zdravko Maslar

feenschach, 1989 (v)

1st Prize

14+8

ser-s=34

7) George Sphicas

The Problemist 2002(v)

19.g8=R 20.Rg4 21.Rga4
26.g8=R 27.Rg3 28.Rxb3
29.Ree3 32.c8=R 33.Rcc7
34.Kb6 35.R6a7 36.R4a6 38.a5
39.Rbd3+ Bxd3=

8) 1.cxb8=R 2.Rb5 3.Rdb8
4.d8=R 5.Ra7 7.fxg8=R 8.Rf8
9.g8=R 10.Rgg7 11.Rgb7
13.g8=R 14.Rgg6 15.Rga6
18.g8=R 19.Rgg6 20.Rgb6
22.Kd6 23.Bc8 28.g8=R
29.Rgg7 30.Rgc7 31.Rdd7
32.Kc6 33.Rf4+ Sxf4=

8) Zdravko Maslar

feenschach 198/2013

13+9

ser-s=33

(*) The version 7 appears in The Problemist Nov. 2014

9) G. Spिकास

2nd Prize, feenschach 2014

7+8 ser-s=29

Our next example is AUW+2 on one square, shown in **9**.

9) 1.cxd8=B! 2.Ba5 3.d8=Q 4.Qc7 5.cxd6 7.d8=R 8.Rd6 9.Rb6 12.d8=R 13.Rd5 14.Rdb5 18.d8=R 19.Rd4 20.Rdb4 22.d5 24.Kc5 27.d8=S 28.Sc6 29.Qh2+ Kxh2=

The following example is the recent **10**, showing six promotions to bishop all on one square, here d8.

10) G. Spिकास

1st Prize, feenschach 236/2019
Dedicated to Hans Gruber

11+7 ser-s=31

10) 1.exd8=B 2.Be7 3.d8=B 4.d7 5.d6 6.Kd5 7.Bb8 8.Ba5 9.d8=B 10.d7 11.Bc5 12.Bca7 13.Bdb6 14.d8=B 15.Bdc7 16.Kc6 17.d5 20.d8=B 21.Be7 22.Bec5 23.cxd3 28.d8=B 29.Bde7 30.Bed6 31.Qe4+ Kxe4=

A little competition began in 1991, when promotions in Queen was the main theme. In **11**, we have five promoted Queens.

11) G. Spिकास

Prize, feenschach 1991 (v)

12+9 ser-s=35

11) 1.Sc2 6.exf8=Q 7.Qa3 8.f8=Q 9.Qxf6 10.Qfa1 13.f8=Q 14.Qxf4 15.Qxd2 20.f8=Q 22.Qfa8 23.f4 24.Kb4 26.Rb7 27.Q3a7 28.Q1a6 29.Ka4 30.Qda5 31.Sb4 35.fxe8=Q+ Bxe8=

Heinonen showed 6 Q promotions very nicely in **12**.

12) 1.f8=Q 2.Qf4 3.Qb8 8.f8=Q 9.Qf3 10.Qfa8 15.f8=Q 16.Qff3 17.Qfb7 18.e4 19.Rc3 20.Rc7 21.Sc6 23.e8=Q 24.Qe5 25.Qxb2 29.e8=Q 30.Qe3 31.Qea7 36.e8=Q 37.Qee2 38.Qe6 40.Kb6 41.Sb5 42.Qh8+ Kxh8=

12) Unto Heinonen

Problemblad 2000

13+7 ser-s=42

13) M. Caillaud

Problemesis 36/2003(v)

16+7 ser-s=20

13 shows AUW on a unique square: b8. It reached the FIDE Album 2001-2003.

13) 1.b7 2.b8=S 3.Sd7 6.b8=B 7.Bf4 11.b8=R 12.Rc8 13.Rc2 18.b8=Q 19.Qb3 20.Qg8+ Kxg8= The version is in Problemesis 45/2005

We want to conclude this article with two recent problems: an amusing work by Michel Caillaud and one by Paul Răican with an unusual condition.

14) 22.Kc6 23.b8=R 24.Rb7 46.Ka6 47.a5 48.d3+ K~=

15) 1.Bd4 2.Bc3 [+wPd4] 3.Ba5 [+wPc3] 4.Bxb6 [+wPa5] 5.Ba7 [+wPb6] 6.b7 7.b8=R 8.Rb6 9.Kb7 [+wPc7] 10.c8=S 11.Kc7 [+wPb7] 12.b8=B 13.Rb7 [+wPb6] 14.Se7+ Bxe7=

No single stipulation is best suited for promotion records, but these examples show that the stipulation ser-s= can produce some impressive results.

George P. Spicas
International Master of Chess Composition

An interesting Thematic Tourney from Springaren

In the Winter 2009-2010, **Springaren** magazine proposed an amazing Thematic Tourney with this simple request: **the King makes the last move**. This theme gave great freedom to creativity, and there were no less than 108 contributions (one cooked) from 50 composers. The judge **Göran Forslund** had then a difficult task and in the end he picked out 6 prize winners. We reproduce here only few classified works.

1) is a spectacular s#11, with many pins and unpins.

1) 1.Qe3+ Kf5 2.Qh3+ Ke4 3.Bh2+ Be5 4.Rb4+ Bc4 5.Ra4 a5 6.S5b4+ Bd5 7.Sc6+ Bc4 8.Sd4+ Bd5 9.Se6+Bd4 10.Bc6 Bxc6 11.Qf5+ **Kxf5#** Surprisingly, Gustav found a cook in 10: **3.S5b4+!** Bd5 4.Rxa1 a5 5.Rxa5 Bc6 6.Re7 Bd5 7.Bc6 Bxc6 8.Bg3+ Kf3 9.Bh2+ Kf2 10.Qg2+ Bxg2#

Two chameleon echo mates in **2)**

2) 1.Qg4 gxf8=B(Bc1) 2.Rxc1(Rh8) **Kf2#** and 1.Ke3 gxf8=Q(Qd1) 2.Rxd1(Ra8) **Ke2#**

4 solutions

6) V. Crisan & P. Raican
Springaren Winter 2010 TT
3 Prize

10+8 -10 & s#1 Proca
Circe Assassin

5) 1.b1=S 2.Sd2 3.Sxe4 [bSe4->g8] 4.Sf6 5.Se4 **Kxe4 [wKe1]=**
1.b1=B 2.Bxd3 [bBc8] 3.Bg4
4.Be2 5.Bd3 **Kxd3 [wKe1]=**
1.b1=R 2.Rb4 3.Rxc4 [bRa8]
4.Ra4 5.Rc4 **Kxc4 [wKe1]=**
1.b1=Q 2.Qb7 3.Qxd5 [bQd8]
4.Qg8 5.Qd5+ **Kxd5 [wKe1]=**

The play is somewhat mechanical here, but the unity between the phases impressed the judge.

6) gave to me and my friend Vlaicu Crisan a lot of trouble with his finishing, but in the end we had great satisfaction. I guess it was worth the work, wasn't it?

Sol: -1.Bc5xQg1(Qd8, -bBd8)! Qh2-g1+ -2.Sd7xPb6(Pb7) b7-b6+ (wK was in check via wBc5) -3.Bb6-c5 Be7-d8+ -4.Bc5-b6 Bd8-e7+ -5.Bb6-c5 Be7-d8+ -6.Bc5-b6 **Rd6xPd2(Pd2, -bRd2) -7.Bb4-c5 a6-a5+ -8.Bc3xPb4(Pb7, -bSb7) b5-b4+ -9.Bd4-c3 **Bd5xPg2(Pg2, -bBg2)** -10.Be3-d4 & **1.Bg5+** (check to King via bPh4) **Kg6#** Must say that Kg8 and Kh8 are not legal because it is self-check: g8 is guarded by Pc7 via Sb7 and h8 is guarded by Pe5 via Rd6. After Kg6, the white King is in checkmate via wBg6 (Note: the diagram in Springaren was wrong printed)**

Here is the comment of the judge: *I think it's incredibly clever, but I'm afraid I don't appreciate it as much as I should.*

If you want to see more other **Proca Retractors Assassin Circe**, then read the article *Circé Assassin, un genre du XXI siècle*, Quartz 36/2011 (in French language).

**7) Ch. Jonsson &
Rolf Wiehagen**
Springaren Winter 2010 TT
1 Prize

9+12 8 solutions h#2

With his eight solutions all finishing by white King checkmating, it's easy to understand the high placement of **7)**

- 1.Ba3 hxc5 2.Bxb4 **Kxf4#**
- 1.Rb2 Kf6 2.Rxb4 **Kxg5#**
- 1.Sd5 bxc5 2.Sb4 **Ke6#**
- 1.Sfd3+ Kf6 2.Sxb4 **Kxg6#**
- 1.Sa6 exf5 2.Sxb4 **Ke4#**
- 1.Bxf7 bxa7 2.Qxb4 **Kxf5#**
- 1.Ra4 Kf6 2.Rxb4 **Ke7#**
- 1.Qxb6 Rd5 2.Qxb4 **Kd6#**

**Murfatlar Thematic Tourney for Proof Games - 6th edition
WCCC Batumi 2023**

In 2020, Thomas Brand hosted on his site the **5th Retroblog TT**, the requirement being proof games with the condition **Fuddled Men** (judge B. Gräfrath). At **Murfatlar TT6**, Fuddled Men is also required, but **an additional fairy condition** (no fairy units) could be used.

Theme: Proof Games in which **Fuddled Men** condition must be presented. The authors can add another fairy condition, but not fairy pieces. This condition can be tested with Jacobi.

Definition Fuddled Men: No unit can make two moves in succession. This restriction also holds for the effect on the opponent's King. (the fairy condition was invented by John D. Beasley, and his pioneering play appeared in the 1987 British Chess Magazine)

Examples (without fairy conditions):

Sol 1: 1.c3 h5 2.Qb3 Sf6 3.Kd1 h4 4.Qxf7 d5 5.Kc2+ Kd7
6.Qe8 h3 7.Kd3+ Ke6 8.Qa4 Sbd7 9.Ke3 Rb8 10.Qd1

A round trip can be managed, which due to the *Fuddled* condition must be built in single steps with interruptions. In 1) the white Queen is the thematic piece.

16+15 PG9.5
Fuddled Men

2) M. Caillaud
Prize, Retroblog TT5/2020

15+15 PG23.5
Fuddled Men

Sol 2: 1.a4 Sh6 2.Ra3 Rg8 3.g4 Sf5 4.Rc3 h6 5.g5 Sh4
6.Rc6 dxc6 7.c4 Bf5 8.Qb3 Kd7 9.Kd1 Bh7 10.g6 Ke6 11.Kc2
Sd7 12.gxh7 g6 13.Kc3 Rg7 14.h8=R Kf6 15.Kb4 Rh7 16.Qf3
Kg7 17.Rg8 Rh8 18.b3+ Kh7 19.Rg7 Rg8 20.Bb2+ Kh8 21.Rh7+
Rg7 22.Bd4+ Kg8 23.Rh8 Rh7 24.Sc3#

The 'Fuddled' condition is used extensively to display rich thematic content. You have to undo sKg7-h7 and then wRh7-h8, but that's not enough to untie the knot. This only succeeds when both thematic Rooks complete a circuit (whereby the black Rook almost completes a second circuit). The thematic white Rook came about through promotion, but is not 'obtrusive' because the original rook was taken from a1 to c6 (Phoenix theme). It's also great that the black King gets to g8 by a very tortuous path. The fact that the proof game ends in mate I consider an added bonus. (B. Gräfrath)

Deadline: September 02, 2023.
