

Circé Assassin, un genre du XXI siècle

par V. Crișan & P. Răican

1) L'apparition

En 2007 j'ai (P.R.) découvert le genre Circé Assassin, dans les pages de la revue Phénix. La définition est simple: jeu Circé, mais si la case de renaissance est occupée, la pièce capturée renaît, c'est la pièce occupante qui disparaît. En particulier, une pièce (sauf le Roi) est auto-protégée si elle se trouve sur sa case de renaissance. Pour comprendre les astuces du genre, j'ai analysé attentivement les solutions des problèmes - tous composés par Didier Innocenti (pour l'histoire du genre voir la fin d'article).

A1) D. INNOCENTI
Phénix 40, 1996

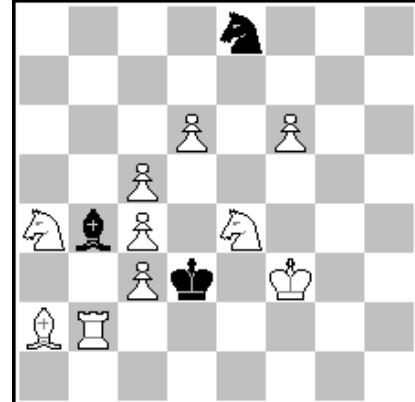

(3+4) C+ ser-h#4
Circé Assassin
zéro-position

a) Re8 → h7 b) Pd6 → f7

a) 1.e1=C 2.d1=T 3.Td4 4.Cg2 Cd7-f8# Nous voyons donc, que la case g8 est contrôlée par l'intermédiaire du Roi h1, parce qu'il attaque le Cg2 et la case h8 est contrôlée par l'intermédiaire du Cf5, parce qu'il attaque la Tour d4.

b) 1.e1=F 2.d1=D 3.Dg4 4.Fg3 Cd7-f6# Ici, dans la position de mat sont contrôlées indirectement les cases d8 et f8 (5.Rd8? serait un auto échec). Allumwadlung.

A2) D. INNOCENTI &
C. POISSON, Phénix 46, 1996

(10+3) C+ #2 vvvv
Circé Assassin

A2) Essais:

- 1.Cf2+ ? mais 1...Cxf6 [+Pf2, -Cf2] !
- 1.Td2+ ? mais 1...Cxd6 [+Pd2, -Td2] !
- 1.f7? [2.Cf2#] mais 1...Cxd6 [+Pd2]!
- 1.d7? [2.Td2#] mais 1...Cxf6 [+Pf2] !

1.Cb6! [2.Fb1#]

- 1...Cxd6 [+Pd2] (pour jouer 2...Cxe4[+Cb1]) 2.Cf2 #
- 1...Cxf6 [+Pf2] (pour jouer 2...Cxe4[+Cb1]) 2.Td2 #

Ces exemples ont relevé une importante astuce: le Roi est en échec s'il se trouve sur la case d'origine d'une pièce propre qui est en prise ! Alors, j'ai eu l'idée de combiner Circé Assassin avec mon énoncé préféré, le Rétracteur de type Proca. J'ai montré mes premiers réalisations à Vlaicu Crișan. Il a deviné rapidement les possibilités infinies du mariage Circé Assassin-Proca Rétracteur et en court temps ont surgis d'autres valeureux œuvres. Sur ce point, laissons parler Vlaicu Crișan.

2) The Suicide Theme

The Suicide theme: Self elimination of a unit of own color, through a capture of an adverse unit. Suicide is different from a sacrifice, because the sacrifice can be refused, while the suicide does not depend on the adverse part's reaction.

Exemples:

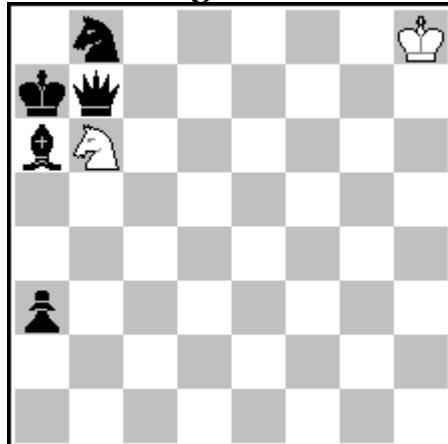

- a) wRc5xbBc8(-wRc8, +bBc8)
= Active Suicide of wR;
- b) w: Rc5 Sc8 b: Bf5
wRc5xbBf5(+bBc8, -wSc8)
= Passive Suicide of wS.

The suicide theme is particularly suitable for retro analytical problems. Let's start with a very simple composition, which I invite you to solve together:

A3) V. Crișan & P. Răican
Original

- I) R: 1.Qg8xSb8(>Sb8) &
1.Qb3#
- II) R: 1.c7xSb8(>Sb8) &
1.c8=S# (1...Qxc8(>Sb1) ? self-check)
- III) R: 1.Kg8xSh8(>Sb8,
-wRb8) & 1.Sc8#

First and second solutions show active suicides, the third solution shows a passive suicide.

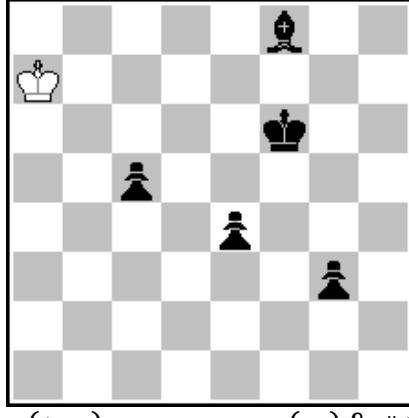

(2+5)

White retracts
the last move and #1
Circe Assassin 3 sol

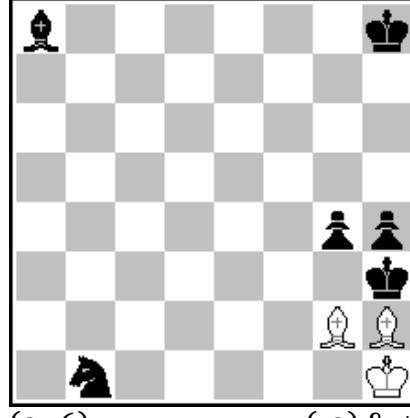

More promising seems to be the combination of Circe Assassin with Proca Retractor in which White and Black first retract some moves, Black not helping.

**A4) V. Crișan & P. Răican
3 Comm - Quartz 31/2007**

Proca Retractor Circe Assassin

**A5) V. Crișan
Problemaz 2/2007**

Proca Retractor Circe Assassin

[bRh3]

A4) 1.Kb6×Ba7(-bBf8,+bBf8)! Bb8-a7 2.Ka5×Bb6(-wSf8,+bBf8) Ba7-b6 3.Kb4-a5 c6-c5+ (c7-c5+?) 4.Kb5-b4 c7-c6+ 5.Qc1×Pc7(-Qc7,+Pc7) ! then

1.Qf4# (e7 et g7 controlled by Qf4, 1...Ke7/Kg7? self-check)

The first Proca Retractor Circe Assassin ever published! Passive suicide of wS and active suicide of wQ in miniature form.

The Suicide theme can be shown also by Black, as the next problem proves:

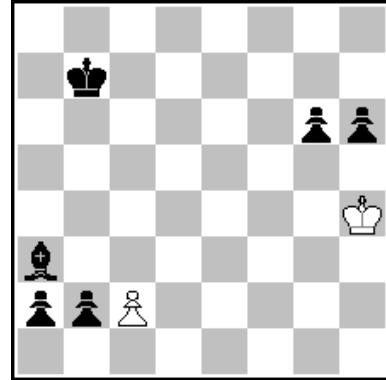

A5) 1.Bf1-g2!! Rf3xBf1(+wBf1,-bRf1)! 2.Bg3-h2 Sh2xBf1(+wBf1,-bSf1)! 3.Bd3-f1 & 1.Be5# 1....Rf6?? self-check. Two active black suicides (bR and bS).

The next problem shows one white passive suicide and one black active suicide:

Note that in the initial position the black King is in mirror position and is completely free.

A6) R: **1.Kg5-h4** h7-h6+ 2.Kh5-g5 g7-g6+ 3.Kg4xh5(ph7, -bBh7)! h6-h5+ 4.Kf5xg4(Pg7, -bBg7)! Bg8-h7+ 5.Ke5-f5 Bf8-g7+ 6.Kd5xBe5 (>Bf8, -wRf8)! Bh7-g8+ 7.Kc5-d5 Sb4xPc2(>Pc2)+ 8.Ra8-f8 & 1.Ra7#

**A6) V. Crișan & P. Răican
3Prize – P. Paradise 2006-07**

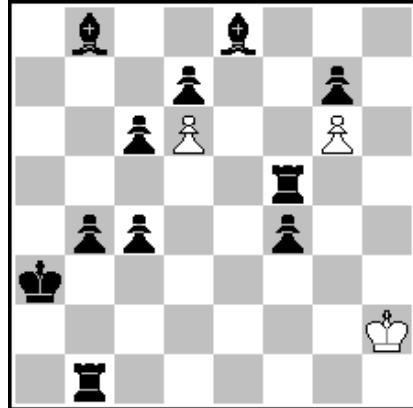

Proca Retractor Circe Assassin

Why is it mate? Because bK cannot take on a7 (a2 being threatened by the newly reborn Rook on a1), cannot play on b8, because bSb4 is attacked by wK and cannot flee on c8, because wR would capture bBh7. A very specific mating position! K. Prentos, the judge, appreciated this work: *One of the first combinations of Circe Assassin with Proca-Retractor and a very successful one. Circe Assassin is perhaps more suitable than Anticirce to be combined with Proca. Pieces can be uncaptured almost anywhere, and often other pieces besides the King can force the retro-play. Of course, this assertion has to be supported by other successful examples like this one.*

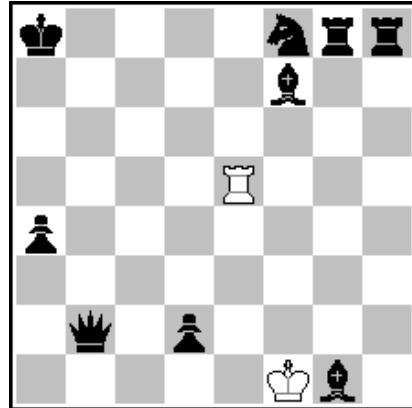

The forward play can be selfmate in 1, as we shall see in the following example:

A7) V. Crisan
2 Prize, Champagne
Tourney, Rhodes 2007

(3+11) (-8) & s#1
Proca Retractor Circe Assassin

A8) V. Crisan
Die Schwalbe 229/2008
(version)

(2+9) (-7) & #1
Proca Retractor Circe Assassin

A7) R: **1.Kg2-h2!** Rf7-f5 2.f5xg6(pg7)e.p. g7-g5 3.Kf2xg2(>g7, -wQg7)! Re7-f7+ 4.Ke2-f2 Rf7-e7+ 5.Kd2-e2 Ba7-b8+ 6.c5xd6(pd7)e.p. d7-d5 7.Kc2xd2(>d7, -wSd7)! Bb8-a7+ 8.Sb6-d7 & 1.Qb2+ Rxb2(Qd1)#

The composing tournament requirement was to show at least two en passant captures in a retro composition. However, here the en passant captures are overshadowed by the two white passive suicides, as the judge (Michel Caillaud) rightly pointed out.

The suicide theme can be combined with other themes as well. We have previously seen Allumschlag and en passant. The next problem will show other well-known themes (Seeberger and Excelsior).

A8) R: **1.Kf2-f1!** with two possible black variations:

- a) 1...Bh2-g1+ 2.Kg1-f2 Bg3-h2+ 3.Kh2-g1 Bh4-g3+ 4.Kg3-h2 Bg5-h4+ 5.Kh4-g3 Bh6-g5+ 6.Kg5-h4! (and not 6.Kg5xRh4(>Rh8)? Bg7-h6+ & 1...Qxe5(>Ra1)# the forward defense) 6...Bg7-h6+ 7.Qh5xRh8(>Rh8) & 1.Qxf7(Bc8)#

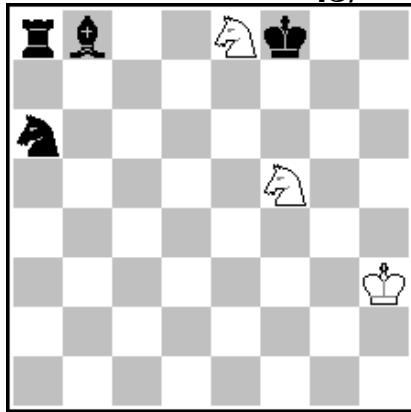

b) 1...g2-g1=B+ 2.Kf1-f2 g3-g2+ 3.Kf2-f1 g4-g3+ 4.Kf3-f2 g5-g4+ 5.Kf4-f3 g6-g5+ 6.Kf5-f4 g7-g6+ 7.Qg1xg7(>g7) & 1.Qa7# (1...Kxa7(Qd1)? self-check via Pawn a4) Now, 7.Qh5xRh8(>Rh8) & 1.Qxf7(Bc8)? is self check!

This problem combines the white Queen suicides with **Seeberger** (in the first variation), **Excelsior** (in the second variation) and dual avoidance.

Unfortunately, wRe5 serves only to avoid forward defenses. One might think that the author neglected the possibility of using the "No Forward Defense" stipulation, but in this case we have the dual 6.Kg5xRh4(Rh8, -bRh8). This forward defense explains also the presence of bQb2 and bPd2.

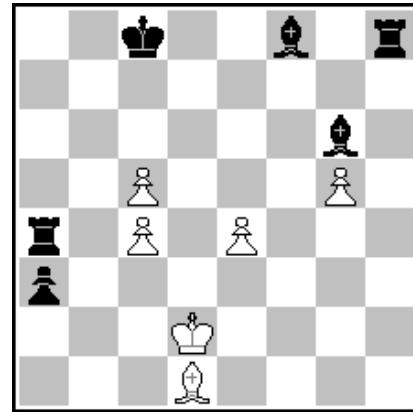

A classical theme, wK staircase, is realized in A9 in economical form:

A9) V. Crisan
Comm - StrateGems43/2008

(3+4) (−10) & #1
Proca Retractor Circe Assassin

A10) P. Răican
6HM - Die Schwalbe 2009

(6+6) (−8) & #1
Proca Retractor Circe Assassin

A9) R: 1.Kg2xRh3(Ra8, -bBa8)!! Rf3-h3+ 2.Kg3-g2 Rf4-f3+ 3.Kf3-g3 Re4-f4+ 4.Kf4-f3 Re5-e4+ 5.Ke4-f4 Rd5-e5+ 6.Ke5-e4 Rd6-d5+ 7.Kd5-e5 Rc6-d6+ 8.Kd6-d5 Rc7-c6+ 9.Kc6-d6 Rb7-c7+ 10.Sd6-e8 & 1.Kxb7(Ra8, -Ba8)#

Here is an aristocrat miniature, where wK does almost all the job.

Placing a B on bR's rebirth square is a familiar device, as we can also see in the next problem.

A10) Here we can see the first realization of a draw pendulum in Circe Assassin. In order to force the mate, White needs first to control b8, but how can this be done? As seen in an earlier example, the solution is a bKnight suicide. This can be achieved only after a preparatory maneuver, blocking f6; only afterwards is possible the retraction of wP on c2:

1.d4xRc5(Rh8, -bBh8)! (wK in check from Bh8 via Pd4 !) Re5-c5+ 2.Ke2-d2 (wK in double-check from Bg6 and Re5 via Pe4 !) Rf5-e5+ 3.Kd2-e2 Re5-f5+ 4.Ke2-d2 Rf5-e5+ 5.Kd2-e2 Rf6-f5+! (5....Re5-f5 ? retro-stalemate) 6.c2-c4

(wK in check from Ra4 via Pd4 !) R~a4+ 7.h4xBg5(Bf8, -bBf8)! Se3xc2
(-Sc2, +wPc2)+!! 8.Qe7xf8(-Qf8,+Bf8) & 1.h5# (model mate by Ph5 via Bg6, a very exotic mate by Pawn; 1.....Kb8? self-check from Kd2 via Se3)

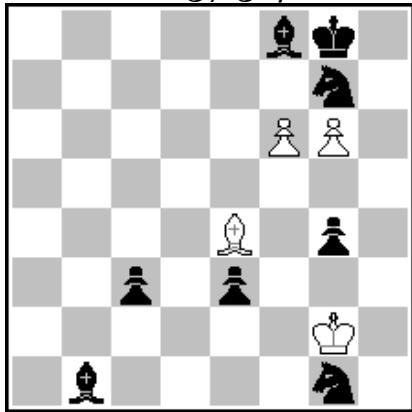

As in A9, the mate is done by threatening the capture of the bB whose rebirth square is occupied by the bK. The two active suicides, both occurring at the end of the retro play, are just the icing on this remarkable cake.

The following problem shows the castling in retro play , an idea I had during the congress in Brazil. The final position is a result of fruitful collaboration with Paul:

A11) 1.Ba8-e4! (now, wK is in check from Bb1 via g6) e4-e3+ (1...Ba2-b1+ 2.Kf2-g2 e4-e3+ 3.Ke3xBf2(Bf8) Bg3-f2+ 4.Kf4-e3 Bf2-g3+ 5.a7-a8B & 1.a8=Q(R)#)

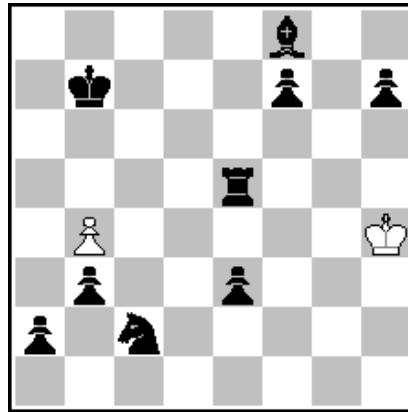

2.g5xBf6(bRf8)! Bd4-f6+! 3.Kf1-g2! (now, wK is in double check) o-o+! 4.Kf2-f1 Be5(f6)-d4+ 5.Sf7xRh8(Rh8, -wS) & 1.Bc6#

A11) V. Crișan & P. Răican
Mat Plus 37-38/2010

(4+8) (−5) & #1
 Proca Retractor Circe Assassin

A12) P. Răican & V. Crișan
4Prize - The Problemist 2008

(2+9) (−6) & #1
 Proca Retractor Circe Assassin

A12) A remix of A6's idea, adding a new variation with a different mate. This is the second problem in the selection showing that retro variations are possible in Circe Assassin, even without white force on the board.

R: (-1) Kg3xPh4(Ph7, -bBh7)! h5-h4+ 2.Kf4xBg3(Bf8, -bBf8) B~-g3+
3.Ke4xPf4(Pf7)! Rf5-e5+ 4.Kd4-e4
 4....Sa3-c2 **5.Kc5xBd4(Bf8, -wRf8)!** Be5-d4+ 6.Ra8-f8 & 1.Ra7#
 (1...Kb8?, 1...Kc8?, 1...Kxa7(Ra1)? self-check)
 4....Sa1(Se1)-c2+ **5.Kc5xBd4(Bf8, -wQf8)!** Be5-d4+ 6.Kb5-c5 & 1.Qb8# (1...Kxb8(Qd1)?, 1...Bxb8(Qd1)? self-check)

With so many black pieces on their original squares there are plenty of possible suicides, so it is quite surprising that no piece is left on f7. We leave to the careful reader the task of investigating why 3.Ke4xf4(f7, -bBf7) doesn't work.

The comments of the judge, Thomas Maeder:
Since it was determined that some Circe varieties allow Proca retractors with

deep content to be constructed economically, this field has become one of the hottest in chess composition, despite the fact that less than a handful of composers have been the driving force. So far, almost everybody restricted themselves to Anticirce, but this problem show that Circe Assassin may be just as promising.

A13: Here the imposed appealing theme required pins of the same piece on different lines. It is quite instructive to note how the problem was created: Eric came with the idea of using wS specific pins under wPs, Vlaicu set the initial scheme, Paul, from Romania, rearranged some pieces and Kostas discovered a cook and fixed it.

1.Sc5-b3 Bb1-a2+ (The Sb3, which was pinned on b3 closing the threat of Ba2, returns to c5. The Ba2, which was checking since Ba2xe6(+wPe2) assassinates the white King, returns to b1) 2.e5-e6 Bc1-b2+ / Ba3-b2+ (The Pawn e6 returns to e5. The Bb2, checking from there since Bb2xe5(+wPe2) assassinates the white King, returns, let us say, to c1)

3.Se6-c5 Rb6-b5+ (The Sc5, which was pinned on c5 closing the threat of Rb5, returns to e6. The Rb5, which was checking since Rb5xe5(+wPe2) assassinates the white King, returns to b6)

4.Kf2-e2 g4-g3+ 5.Sd8-e6 Rb5-b6+ 6.f5-f6 Ba2-b1+ / b2-b1=B+ (The Pawn f6 returns to f5. The Bb1, which was checking since Bb1xf5(+wPf2) assassinates the white King, could be a Pb2 promoted to Bishop on b1)

7.Sf7-d8

And now forward 1.Kg3!# (1....Kg3xh3(+bPh7)? with instant assassination of the bK)

The black King is mated! The squares h6, h8 are guarded by the wSf7 and the square g6 is observed by the wPf5. Also 1...Kg7 2.Kxg4(+bPg7) and 1...Kg8 2.KxSg2(+bSg8).

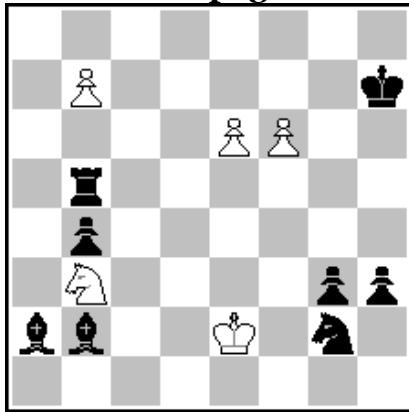

Judge's comment (M. Caillaud) : *Nice use of Circe Assassin condition with typical pins and mating move. White Knight is pinned on 3 different lines.*

A14 is another Proca with s#1 in forward play:

R: **1.Kg2-h3!** (wK in double check via g6) Rd3-d6+ 2.Rh4xRh5(Ra8, -wRa8) Rh8-h4+ 3.Rh2xRh4(Rh8, -bRh8) Rh3-h4+ 4.g3-g4 Rh4-h3+ 5.g4-g5 Rh5-h4+ 6.g5-g6 Rh6-h5+ 7.g6-g7 Rh7-h6+ 8.Kg1-g2 Bc1-e3+ 9.Qe5xRh8(Rh8, -wQh8) & 1.Rb2+ Rxh1(Sb1, -bQb1)# (2.Kf2(Kg2)? self check)

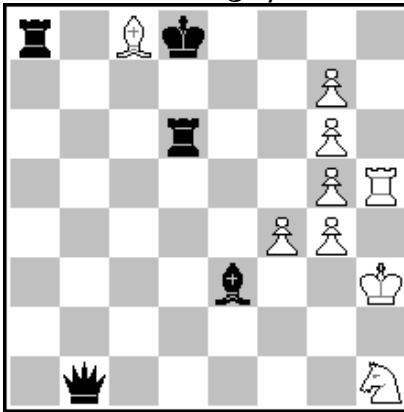

Perhaps the most difficult Proca Retractor to solve from this selection, as you need imagination to discover how Black will be forced to mate White. The answer is quite unexpected: as bK occupies bQ rebirth square, an attack of bQ might force black to capture the seemingly useless wS from the corner - hence a passive suicide in the forward play. The whole solution runs with lots of subtle points,

**A13) V. Crisan, P. Răican,
E. Huber & K. Prentos
1Prix – Champagne 2008**

(5+8) (-7) & #1
Proca Retractor Circe Assassin

**A14) P. Răican &
V. Crișan
StrateGems 50/2010**

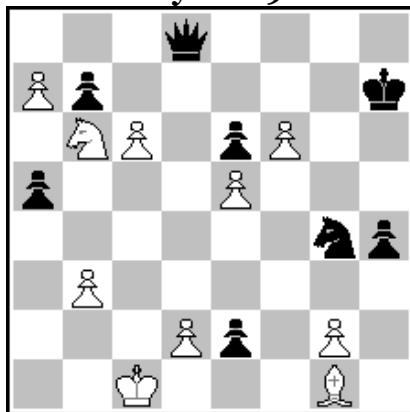

(9+5) (-9) & s#1
Proca Retractor Circe Assassin

as wRh5 hesitantly must occupy the 2nd line after decapturing two black Rooks on the rank. It is also interesting how black makes two "self blocks" severely limiting bQ's freedom of movement. There are also two white suicides in the retro play - and the need to suicide a wR instead of a wQ in W2 is revealed only after the forward play: wQa8 would simply control h1, thwarting the black mate.

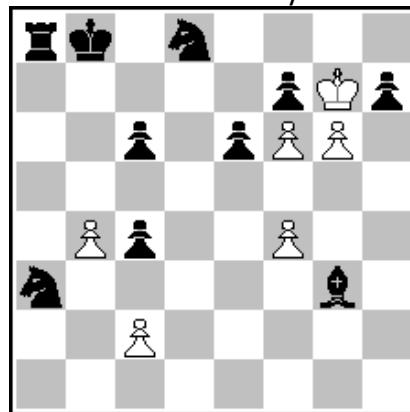

The Springaren's Winter Tourney 2009-10 theme required checkmate with K. Of course, our first thought was to create a Proca Circe Assassin. Here is the problem which was classified by Goran Forslund among the prizes:

**A15) V. Crisan, P. Răican
3Prize – Springaren Winter
Tourney 2009-10**

(10+8) (-10) & s#1
Proca Retractor Circe Assassin

**A16) P. Răican &
V. Crișan
Probleemblad 1/2011**

(9+5) (-9) & s#1
Proca Retractor Circe Assassin

A15) **1.Bc5xQg1(Qd8, -bBd8)!** Qh2-g1+ 2.Sd7xb6(pb7) b7-b6+ 3.Bb6-c5 (wK in check via Bb6) Be7-d8+ 4.Bc5-b6 Bd8-e7+ 5.Bb6-c5 Be7-d8+ 6.Bc5-b6 +**bRd6!** (avoids retro-stalemate by 3 times repetition) 7.Bb4-c5 a6-a5+ 8.Bc3xPb4(pb7,-CNb7) b5-b4+ 9.Bd4-c3 +**bBd5!** 10.Be3-d4 & 1.Bg5+ Kg6#

Here we see again the familiar idea of draw pendulum forcing an active black suicide. Unlike usually in Proca Retractor problems, this shows absolutely no activity of wK! His Majesty gets attacked by letting the wB *en prise* in each move and in the end this will also create the unexpected mate. The first published composition featuring the Zabunov theme with two active black suicides, but not the first one we composed (see A16)! Very specific check by wB (1.Bg5+), which attacks the bK via Pawn h4 and checkmates by bK (Kg6#), which attacks wK via Bg5.

Unfortunately, we can't write the judge's comments as we don't speak Swedish. Who can provide the translation? Zabunov theme: the front piece of a battery becomes the rear piece of another battery.

Our last work of this selection, A16, is one recently published in the distinguished Dutch issue, Probleemblad:

A16) **1.h5xRg6(Ra8, -wBa8)!** Rh6-g6+ 2.g5xPf6 e.p.(Pf7) f7-f5 3.Rf6-g7 **Bg6xPc2(Pc2, -bBc2)+!** 4.Ke5xPf6(Pf7) f7-f6+ 5.f2-f4 Bh4-g3+ (or +bRf4) 6.Ke4-e5 Rf5xPf2(Pf2, -bRf2) 7.Se5xPf7(bPf7, -wSf7) & 1.Sxc6(Pc7)# Specific assassin mate: Sc6 cannot be captured, because the reborn wSb1 attacks bSa3. The arrangement bRh8-bBg6-bRf5 additionally shows the Zabunov theme. The front pieces are used in the final mating position as indirect guards for flights (c8 and a8). Four minor suicides in all – two by black: Bg6 & Rf5 (actives) and two by white: Ba8(passive) & Se5(active). Moreover, the same black piece (Pf7) is captured by three different white pieces.

We hope the readers will enjoy the selection and the possibilities opened by Circe Assassin and particularly the Suicide theme.

A short history of Circe Assassin: The genre was conceived and baptized by **Romeo Bedoni in 1978**, but the first problems was composed and published only in September 1993, in the well-known French chess review, **Rex Multiplex**. In 1996 **D. Innocenti** developed the genre with interesting works and Circe Assassin was associated with Proca Retractors by **P. Răican** only in 2007.

Ion Murărasu nous a quitté

*12.11.1955 Botosani – †31.12.2010 Galatz

L'un des plus proéminents maîtres Roumains, le spécialiste des aidés, nous a quitté dans le matin du dernier jour 2010. Il a été un précieux ami, cultivé, prêt à apporter sa contribution inestimable pour accomplir un œuvre complexe.

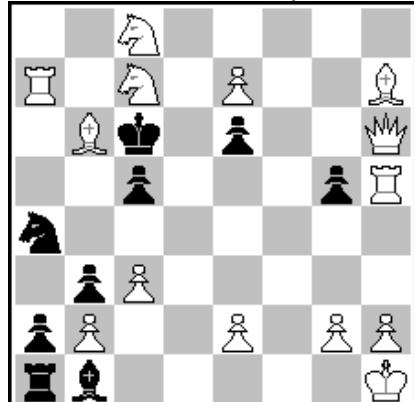

Il a excellé dans le domaine des aidés, mais sa curiosité a été dirigée parfois vers inverses, finales artistiques, multicoups ou même problèmes féeriques. Il a jugé quelques importants tournois, voir le WCCI 2001-2002, section #n.

Ion Murărasu à Halkidiki 2004 (photo Bjorn Enemark)

Voici quelques œuvres choisies presque par hasard:

1.... Rb6 2.a8=C#

Un super AUW excellent, qui emploie pleinement la condition des Rois Transmutés, sept fois (juge M. Ridley)

La sœur du Ion, Michelle Bucatanski, a fait donation avec la riche archive bibliographique héritée vers un club d'échecs en Galatz. Une très belle geste !

Rest in peace, John !

La disparition inattendue du notre cher quartz-maniaque est pour le quadrilatère Ion-Paul-Vlaicu-Eric particulièrement douloureux. Vlaicu et Eric ont dédié le 9-eme Tournoi Tsuica à la mémoire de Ion Murārasu. Je veux lui dédier l'article suivant, ce qui est mon modeste tribut.

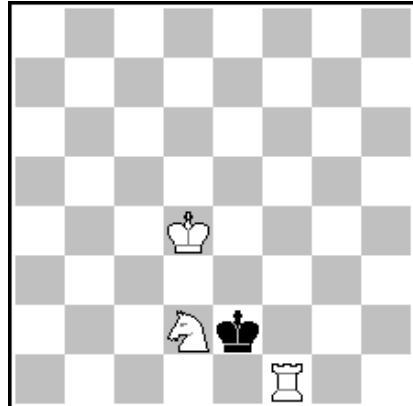

Circé mémoire

En janvier 2011, Dominique Forlot propose un nouveau genre sur France Échecs: Circé mémoire. Définition:

Toute capture de pièce entraîne la renaissance de la pièce capturée précédemment sur la case même où elle a été capturée (si cette case est libre), quelle que soit sa couleur ! La pièce native reprend sa course habituelle. Si la case de renaissance est occupée, alors la prise est définitive.

Voici le problème prototype (CM1):

CM1) 1.Rxd2 [+pn e3] Rc4 2.Re2 Rc3= (Rxf1 ?, +CBd2 auto-échecs)
1.Rxd2 [+pn c3] Tb1 2.Rc2 Re3= (Rxb1 ?, +CBd2 auto-échecs)

Ce problème montre que la pièce mémoire peut exister a priori hors de l'échiquier. La capture du Cd2 est forcée, mais la renaissance des Pions noirs est unique et bien déterminée, n'est pas?

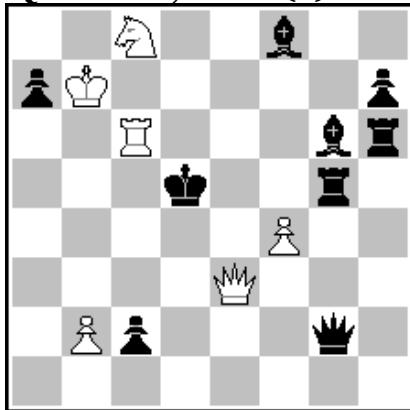

En cas de *prise en passant* la renaissance se fait *sur la case atteinte et non sur la case de capture*. Pour exemplifier, voici CM2, la partie justificative prototype:

1.e4 d5 2.exd5 c5! 3.dxc6 e.p.(pd5) d4 4.c4! dxc3 e.p.(pc5) 5.cxb7(pc4) Cc6 6.bxa8=T(pb7) cxb2 7.Cc3 bxa1=T(pb2).

Dans ce point, il faut remarquer une ressemblance avec le genre Haunted Chess, proposé par T. Wakashima au Congrès de Portoroz, Slovénie 2002: *la pièce prise revient à vie avec toutes ses pouvoirs, après le déplacement de la pièce prenante.*

Voici, par exemple, le problème suivant:

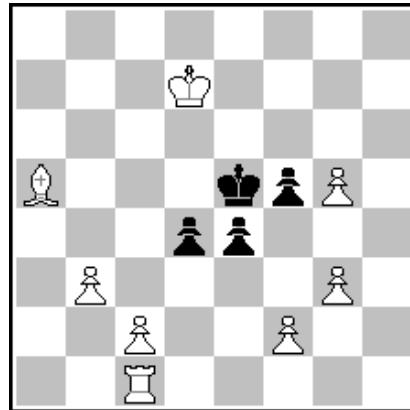

**CM3) Mikhail Marandyuk
Quartz 21, 2002 (v)**

(6+9) #3

Haunted Chess (ou Circé mémoire)

**CM4) P. Răican & D. Forlot
France Échecs 2011**

(8+4) #4

Circé mémoire

CM3) Solution:

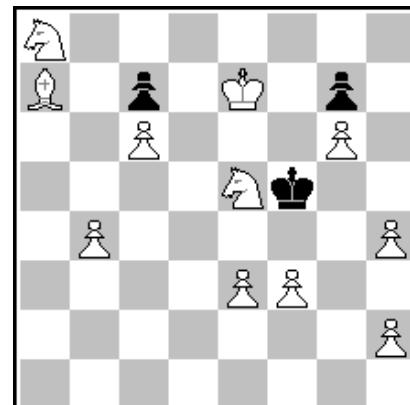

1.b3! [2.Td6+ Fxd6 3.Ce7#]

1...De4 2.Dc5+ Fxc5 3.Td6#, 1...Fe4 2.Ce7+ Fxe7 3.Dc5#

C'est intéressant que ce problème a la même solution avec les règles Circé mémoire.
Restons dans le domaine des problèmes directes avec CM4:

1.f4!+ Rd5 [1... exf3 e.p.? 2.Té1+ Rd5 3.Té5# (Rxe5 ?, +Pf4 auto-échec)] **2.c4!+**
dxc3 e.p. [2... Rc5? 3.b4#] 3.Td1+ Rc5 4.Td5# (la prise entraînerait (+Pc4) auto-
échec) Tableau de mat original et astuce de *prise en passant*.

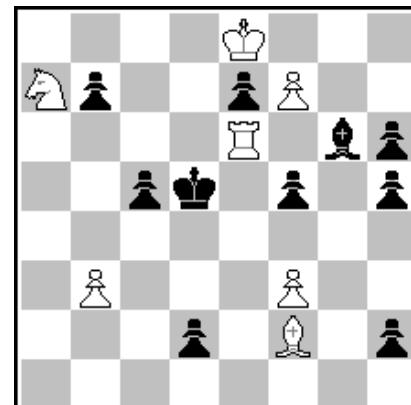

**CM5) P. Răican & D. Forlot
France Échecs 2011**

(11+3) #4

Circé mémoire

**CM6) P. Răican
France Échecs 2011**

(7+10) #7

Circé mémoire

CM5) **1.Cb6!** R \times e5 (1... cxb6 2.c7 et 3.c8=D) 2.Cc4+ Rf5 3. $\ddot{e}4+$ Rf4 4.Fé3# (le pion f3 est protégé par le cavalier fantôme e5)

Si 2... Rd5 3. $\ddot{e}4\#$ (le cavalier c4 et le pion c6 sont tous deux protégés par le cavalier fantôme e5)

Plus longue est CM6) :

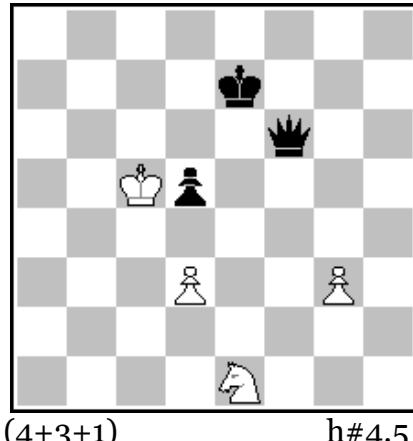

1.Cb5! Rxе6 2.Cc7+ Rf6 (Après 2.... Rd6 il y a un mat en quatre coups: 3.Fg3+ Rc6 4.Rxd7 (+Te6)#) **3.Fd4+** (Sur 3.f4? il y a 3...e6! et la case de renaissance est bloquée.) **3... e5!** (3...Rg5 4.Ce6+ Rh4 5.Ff2+ Rh3 6.Cf4#) **4.f4!** (maintenant, toute prise noir interdite) **4...Rg7 5.Fxe5(+Te6)+ Rh7 6.Txg6** (échange de pièces) **Rxg6 7.f8=C#** (modèle)

Le mat est orthodoxe, mais le jeu est spécifique....

L'idée de ce Circé est cette menace qui plane à chaque prise, comme une épée de Damoclès, idée bien illustrée ici par le coup **4.f4!** (D. Forlot)

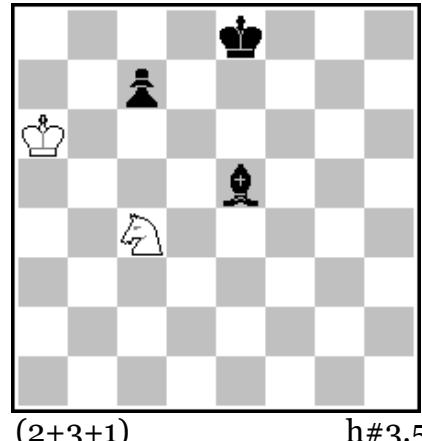

Retour aux h# avec CM7 :

CM7) P. Răican
France Échecs 2011

En mémoire: P noir
Circé mémoire

CM8) P. Răican
France Échecs 2011

T noire en mémoire
Circé mémoire b) Ra6 → h5

CM7) 1... Cf3 2.Dxf3 (+pf5) Rc6 3.Rf6 Rd7 4.Re5 Re7 5.De4 d4# (D,Rxd4? auto-échec)

Deux bébés jumeaux:

CM8) a) 1.... Rb5 2.ç5 Rxç5 (+TNa8!) 3.o-o-o Rç6 4.Fb8 Cb6#

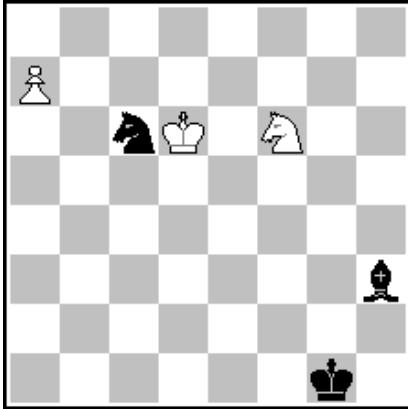

b) 1...Rg6 2.ç6 Cxé5 (+Th8!) 3.o-o Cxç6 (+Fe5) 4.Fh8 Ce7#

Élégant & léger (D. Forlot)

Dès que la définition du nouveau genre a été exposée, Jacques Dupin introduit la variante suivante: *Si la case de renaissance est occupée, alors la pièce prise attend une autre occasion de renaître. Il est possible alors à renaître une ou plusieurs pièces simultanément, après une prise quelconque.* Cette variante a été baptisée **Circé mémoire longue**.

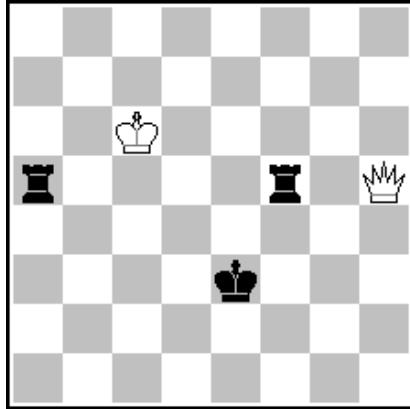

Pour illustrer, voici le problème suivante:

CM9) J. Dupin & P. Răican
France Échecs 2011

(3+3+2) ser-s#5
2 Tours noires en mémoire
Circé mémoire longue

CM10) P. Răican
France Échecs 2011

(2+3+1) hs#4
C noir en mémoire
Circé mémoire longue
b) Tf5 → d5 c) Tf5 → e4

CM9) 1.a8=D 2.D×c6 3.Cg4 4.Re6 5.Dh1+ R×h1(+Td6,Tf6,Cc6)#
Ici, il y a trois pièces qui renaissent. Mat impossible en orthodoxe.

Le problème suivant, toujours en Circé mémoire longue, est un aidé inverse:

CM10) a) 1.D×f5(+CNg5) Td5 2.R×d5 Rd2 3.Ré5 Rç1 4.Dç2+ R×ç2 (+TNd5, +TNf5)#
b) 1.D×d5 Tb5 2.R×b5(+CNa5) Rf2 3.Rç5 Rg1 4.Dg2+ R×g2 (+TNb5, +TNd5)#
c) 1.D×a5 Re2 2.Rb5 Te3 3.Ra4 Rd1 4.Dd2+ R×d2(+TNa5, +CNC6)#

Une observation s'impose: il n'est pas question ici d'empilement: une unique pièce en mémoire par case, pas plus.

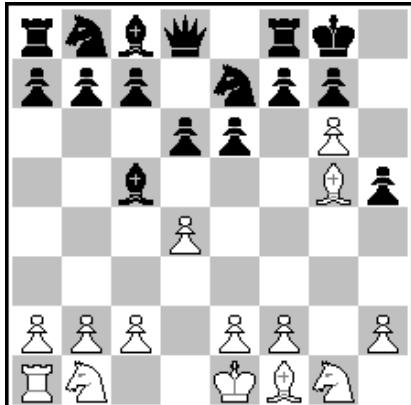

Très captivant c'est le domaine des parties justificatives. Voici CM11, CM12 et CM13 (la dernière est inédite):

CM11) 1.d4 e6 2.Dd3 Fc5 3.Dg6 hxg6 4.g4 Txh2 5.g5 Th8 6.Txh8 (+PBh2)
d6 7.Th5 gxh5(+TNh8) 8.g6 Ce7 9.Fg5 o-o! Roque avec Tour renaissante.

L'intention de CM12) est : 1.Cc3 h5 2.Ce4 h4 3.Cg3 hxg3 4.f4 Txh2 5.f5 **g5!**
6.fxg6 e.p. Txg2(+pg5) 7.gxf7+ Rxf7 8.Th7+ Rg6 9.Txe7(+pf7) De8 **10.fxe8=C!**
a5 11.Cd6 a4 **12.b4 ! axb3 e.p.(De8) !** 13.axb3(pb4) cxd6. Deux p.e.p. et Ceriani-Frolkin C.

Définitions:

Nightrider Locust = Noctambule qui bouge seulement pour prendre, comme une Locuste.

Princess = Fou + Cavalier

SuperPawn = Pion pour lequel marche et capture sont étendues respectivement à toute la colonne et à toute la diagonale.

Circé Cage = Pour une figure donnée, une cage est une case sur laquelle cette figure ne dispose que d'éventuelles captures comme coups légaux (au sens orthodoxe). Lorsqu'une telle cage existe, une figure capturée doit y renaître. Si plusieurs cages existent, le choix est libre et est effectué par le camp capturant. S'il n'y a de cages, la pièce prise disparaît.

Un pion blanc qui renaît en huitième rangée est promut en une figure dont la nature est choisie par le camp noir. La cage doit être une cage pour la pièce de promotion et non une cage pour le pion. Idem pour les pions noirs. Un pion blanc qui renaît en première rangée peut avancer d'un pas ou capturer d'un pas diagonal. Une fois qu'il arrive en seconde rangée, il est considéré comme un pion n'ayant jamais bougé. Idem pour les pions noirs. Une pièce qui vient de renaître est réputée de pas avoir bougé, gardant ainsi des pouvoirs tels que le roque.

Losing Chess (Qui perd gagne): Chaque camp est obligé de capturer s'il le peut. Le Roi n'a plus de caractère royal et ne peut pas roquer. Il est possible de se promouvoir en Roi. Dans les études, un camp a gagné s'il ne peut plus jouer.

HyperVoltage = Une pièce (Roi excepté) change de couleur chaque fois qu'elle change de couleur de case.

Einstein- Grasshopper (Einstein- Sauterelle) = The EG moves like a grasshopper, except that the piece it hurdles changes her nature, according to the following rules:

1) If the EG moves *without capturing*, the piece it hurdles *decreases* according to the following hierarchy: EG-P-N-B-R-Q. Since there is nothing below EG, if an EG hurdles another EG without capturing, the hurdled piece is unaffected.

2) If the EG *captures* a piece on its move, the piece it hurdles *increases* according to the following hierarchy: P-N-B-R-Q-EG. Since there is nothing above EG, if an EG hurdles another EG and captures, the hurdled piece is unaffected.

Note that Kings are never affected by the EG.

(this piece was invented by Ben Good in 2000)

778 (Frolkin & Crusats): Logical Proca retractor in which the foreplan illegalizes the refutation to the main plan. Black defends by destroying White's uncastling right!
Main plan: -1.Rf1-f2? (no uncapture duals) any -2.O-O & 1.Rh8# but -1...d7-d6!

Solution: **-1.b5xBa6!** any **-2.Rf1-f2** any (-2....Kg8-f8 -3.~ & Re8#) **-3.O-O** & **1.Rh8#.** The bS cannot prevent uncastling via -1...Sc3-d1 and -2...Se2-c3!

Retro intention: The bPs captured all five missing white units, thus neither the bS nor the bK can retract any capture. Notice also that the bK cannot defend by means of a selfcheck on e7/e8/g7. The wPs captured six of the seven missing black units. After -1.Rf1-f2 White can uncastle because the light-squared bB could have been taken by a wP and the missing bP originally on h7 could have been taken by a white officer. However, if Black retracts -1...d7-d6, White loses his uncastling rights (at least at this point): the light-squared bB was taken on its homebase, therefore the wPs had to take the promoted bP originally on h7 which due to the promotion on h1 destroyed White's uncastling rights (either because White could have never castled or he castled before the promotion took place). If White retracts -1.b5xBa6, (legal move) he still retains his uncastling rights, and what is better, -1...d7-d6 is now illegal because the promoted bB could have never left h1.

779 (Dupont): Le problème série noire **dualistique** a été tranché depuis 1989 dans feenschach:

Manfred Seidel & Hans-Peter Reich, feenschach 1989

11 Serienzüge, dann 2 Lösungen (en allemand):

- 1) 1. a5 2. d5 6. Ra4 7. Fg4 8. Fxe2 9. Fh5 10. Dd7 11. Dg4, puis 1. c3+ Dxd1#
- 2) 1. d5 2. e5 3. Fh3 4. Dg5 5. Dxg2 9. Rc4 10. Fb4 11. c5, puis 1. e3+ Dxf1#

La version **non-dualistique** a été excellamment résolue par Nicolas Dupont:

1.a5 3.Td6 4.b6 6.Fxe2 7.Ca6 8.Da8 14.Ra4 15.Fg4 16.Df3, puis 1.c3+ Dxd1#

780 (Garai): a) 1.Dg6 Txd6+ 2.Cxc8 Txd5# b) 1.Cg6 Th7+ 2.Dxc8 Th5#

Announces des concours

Klaus Wenda 70 Jubilee Tourney

1) To mark the 70th birthday of IGM Dr Klaus Wenda on 13/09/2011, the **Austrian Chess Association** (*Österreichischer Schachbund*) and the magazine **Schach-Aktiv** announce a composing tourney for orthodox moremoves (without fairy pieces or conditions).

Required are **directmates** in 5 to 15 moves, **in the logical or strategic style**, up to a maximum of 3 entries per author. If the problems have been computer-tested please mark them "C+".

Dr Wenda will himself be the judge in this tourney.

Please send entries to the tourney director:

Wilfried Seehofer, Heilwigstraße 63,

D-20249 Hamburg, Germany, e-mail seehofer@t-online.de.

The closing date (postmark) is 13/09/2011.

2) **feenschach** is organising, as its 64th theme tourney, the

Klaus Wenda 70 Jubilee Tourney

Required are **strategic problems** with the stipulation **mate** or **selfmate** in 4-10 moves, on the normal 8x8 board, using **at least one fairy piece or condition** which plays a thematic part in the problem. Neutral or half-neutral pieces (even if otherwise orthodox) are acceptable as this fairy element. Fairy pieces or conditions are allowed only if they are testable by at least one of the computer programs Alybadix, Popeye or WinChloe.

The judge is **Hans Peter Rehm** (Germany).

Dr Wenda is offering four book prizes.

The complete tourney award will appear in *feenschach* in 2012.

Entries should be printed or stamped on diagrams and sent to the tourney director:

Klaus Wenda, Rasumofskygasse 28, A-1030 Wien, Austria

E-mail: klaus.wenda@chello.at

The closing date (postmark) is 30/10/2011.
